

# INTERIOR

## **Interior design process**

While the municipality provides a decision on the submitted permit, we continue working with the interior design. We draw interior elements and create a electrical and lighting plan. This information serves you to plan ahead with asking the required suppliers for a quote. Moreover, these drawings support the designated contract to work on the finishes during the construction phase.

To help during this process, we provide an interior information booklet with practical advice to support the design decisions you will need to make throughout.

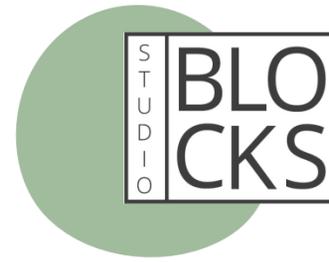

### **01. Drawings**

Our drawings contain essential information about the kitchen, bathroom and toilets (page 3). These drawings also show a floor plan and a facade view of the interior sides of the space. If needed, we can provide drawings of stairs (page 4), closets, and other specialized objects. These drawings include the electrical and lighting plans showing the locations of these elements.

### **02. Discussion and support**

We discuss the design in online meetings as they allow us to easily share the 3D model and make adjustments during the meeting. Besides the design, we show 3D images (page 6) that help in visualising the result.

## INTERIOR DOCUMENTS

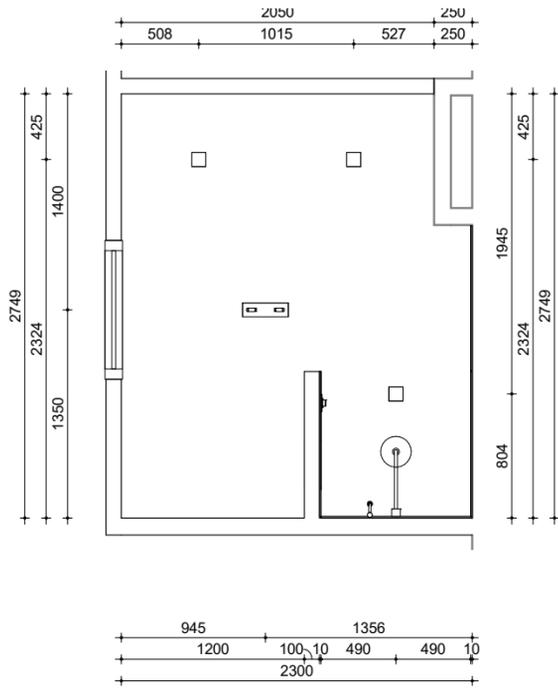

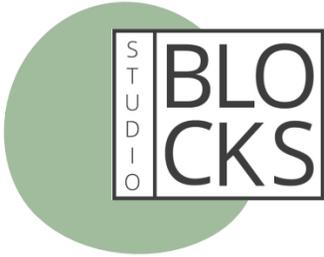

### 01. Drawings

- Kitchen
- Bathroom
  - Toilet
  - Closets
  - Stairs
- Specialized objects
- Electrical locations
- Lighting locations

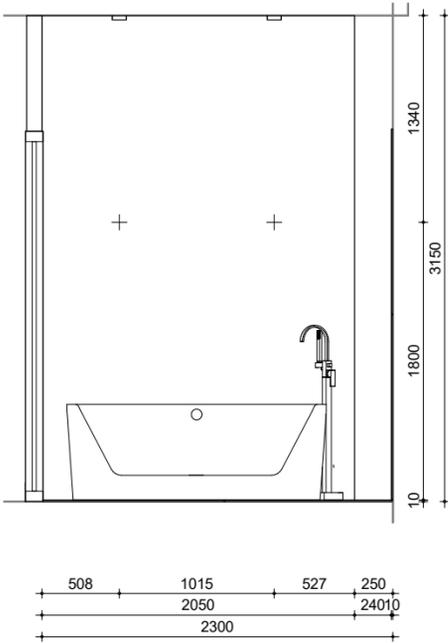

### 02. Support

- Online meetings
- Advice sustainability
- Interior information booklet
  - 3D images
  - Principal details
